Contingencies

The Company is involved in various routine legal proceedings incidental to the ordinary course of its business. The Company believes that the outcome of all pending legal proceedings in aggregate is not reasonably likely to have a material adverse effect on the Company's business, financial condition and/or its results of operations. However, in light of the uncertainties involved in legal proceedings generally, the ultimate outcome of a particular matter could be material to the Company's operating results for a particular period depending on, among other things, the size of the loss or the nature of the liability imposed and the level of the Company's income for that particular period.

(c) *Share-based plans*

Participation arrangements

The Company has equity participation arrangements ("Participation Arrangements") with nine senior employees and one former employee pursuant to which they are entitled to receive a cash payment and shares on the initial public offering (the "Initial Offering") of the Company. The Participation Arrangements serves to reward the past service, and to encourage retention. The terms of the Participation Arrangements differ between participants with vesting participants being entitled to some or all their shares between six months and six years following the Initial Offering.

15. Issued capital (continued)

(c) Share-based plans (continued)

The Company satisfied the participants' entitlements by making a onetime cash payment to participants and by issuing an aggregate 4,790,178 Subordinate voting shares immediately prior to the closing of the Initial Offering. The compensation expense for the Participation Arrangements is calculated based on the fair value of each Participation Arrangement, as determined by the value of the Company at the closing of the Initial Offering, less the value of the cash settlement. The Company recognizes compensation expense over the vesting period of the Participation Arrangement, which is six years.

As of June 30, 2016, 754,327 Subordinate voting shares have vested with a fair value of $15,588 (December 31, 2015 - $nil).

Restricted Share Units ("RSUs")

In connection with and immediately prior to the closing of the Initial Offering, the Company established an RSU plan for all of its current employees (other than the participants under the "Participation Arrangements" and employees in China).

The RSUs serve to reward past service of the employees and align the interests of the employees with those of the Company. The RSUs will be settled with Subordinate voting shares and will fully vest on the first anniversary of the closing of the Initial Offering. Upon vesting of the RSUs, the Company will issue approximately 763,495 Subordinate voting shares. Only employees that are employed on the settlement date will receive Subordinate voting shares. Each RSU granted reduced the quantity of Multiple voting shares issued to the principal shareholders.

The Company classifies the RSUs as equity instruments as the Company has the ability and intent to settle the awards with Subordinate voting shares. The compensation expense for RSUs is calculated based on the fair value of each RSU as determined by the closing value of the Company's Subordinate voting shares on the business day of the grant date. The Company recognizes compensation expense over the vesting period of the RSU.

A summary of the Participation Arrangements and RSU activity since December 31, 2015 is shown below:

Market risk

Foreign currency risk

Due to the nature of the Company's international operations, it is exposed to foreign currency risk driven by fluctuations in exchange rates. Risk arises because the value of monetary assets, liabilities, revenues and expenditures arising from transactions denominated in foreign currencies may vary due to changes in exchange rates ("transaction exposures") and because the non-US dollar denominated financial statements of the Company's subsidiaries may vary on revaluation into the US dollar presentation currency ("translation exposures"). These exposures could impact the Company's earnings and cash flows.

The Company uses derivative financial instruments such as foreign exchange forward contracts to manage foreign currency risk.

As at June 30, 2016, the Company is committed under outstanding foreign exchange contracts to purchase Canadian dollars in exchange for US dollars, representing total purchase commitments of approximately $18,972 (December 31, 2015 - $41,692).
